For a perfect night sleep, COOL or HEAT your bed..not your entire house.

Watch your energy bills plummet while staying cozy and comfortable year round.

Uses safe thermoelectric technology to cool or heat water that circulates throughout the pad so you're cooler in the summer and warmer in the winter.

Preset to the perfect temperatures for sleeping, 70F to cool and 96F to heat.

A great way to settle nightly disputes over your home thermostat.

Fits on any bed, right or left side.

Soft cotton construction.

Quiet, safe, comfortable, and durable.

Discreetly fits underneath the sheets.

Digital temperature display.

Convenient corded remote control to switch ON and OFF.

Relief from hot flash symptoms and night sweats.

Patent-protected product.

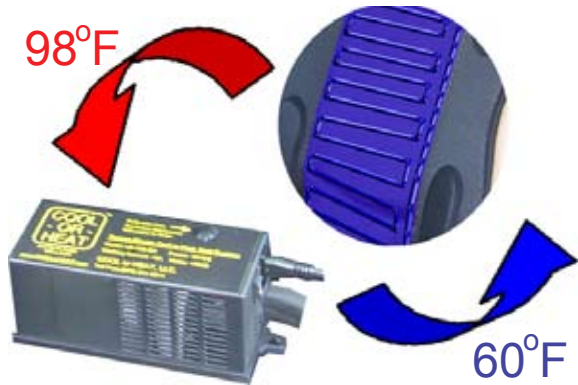

Dimensions:

Pad - 29 x 56 inches

Pump - 8.5H x 5.5W x 6.5D inches

Have the **Coolest (or Hottest)** Ride on the Road with the new **COOL-or-HEAT** Seat Cushion™

It's the only Cooling and Heating Seat Cushion Available!

Just flip the switch, it does both!

Summer or winter you'll stay as cozy as can be because this innovative seat cushion is the only one available that **COOLS...and it also HEATS.**

The **Cool-or-Heat Seat Cushion** uses advanced thermoelectric technology that circulates cooled or heated water.

Relieves stress, discomfort, & fatigue from sitting at a desk all day. It's great to use when you do not have control over the office thermostat.

For drivers, it works great for burning hot car seats, sweaty back/bottom, and lower back discomfort.

It's perfect for daily commuters, errands, and all-day drivers such as delivery and truck drivers, salespeople, etc.

Fits on any vehicle, office, and home chairs. Adjustable straps keeps it from sliding around and the slimline design forms to your seat.

No need to put it in the freezer, just plug it in. Includes a 12V DC vehicle lighter adaptor and a 110V AC wall outlet for home or office use.

The water inside the seat cushion can cool down to 60F and heat up to 98F.

It's safe and environmentally friendly because there is no freon or electrical parts inside the cushion.

Comes in a black cotton fabric that is stain resistant, soft, and comfortable.

Patent-protected product.
